From the Director:

Learning
The children are heading out to Moonta today. We will be jumping on boards the Moonta mines train then having a look through the museum. Cheryl and Rosie have been busy with the breakfast program. The children have been planting vegetables, and strawberries. This is part of our sustainability and numeracy program. Measuring, patterning and quantify are valuable skills for everyday life.

Family Survey
As part of Quality Improvement we continue to involve families in their children’s learning. I have attached a brief survey. Please complete ASAP. I look forward to learning about the many talents that our families can share.

Kindy start time
Please be aware that our start time is 8.30. Prior to this staff are busy setting up and having conversations where confidentiality is a must.

Regards Vicki

Breakfast Program
The children are loving the breakfast program. Not only are they enjoying the smell and taste of the toast but the children are learning valuable numeracy and literacy skills. What a fun way to learn.

Kindy Shirts

Have you seen the brilliant colours of our new kindy shirts. The colours have been intentionally chosen so that girls and boys can wear either. $15 each. These are subsided through the fantastic fund raising proceeds that you all contribute to.
